TRACT 26-22 – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Bayfield County Timber Sale Contract.

- A. PRESCRIPTION:**
- Unit 1 has an oak seed tree prescription with reserve islands and scattered conifer reserves with an estimated average residual basal area of 10 sq ft.
  - Units 2 and 3 both have natural white pine shelterwood prescriptions with conifer and oak reserves and an estimated average residual basal area of 50 sq ft.
  - Unit 4 has an overstory removal prescription with an estimated average residual basal area 20 sq ft.
- B. HARVEST REQUIREMENTS:**
- Unit 1, harvest all hardwood stems 2 inches and greater. Leave all conifer.
  - Unit 2, harvest all hardwood stems 2 inches and greater except for orange marked hardwoods. Harvest all conifer marked with orange paint.
  - Unit 3, harvest all hardwood stems 2 inches and greater except oak. Harvest all conifer marked with orange paint.
  - Unit 4, harvest all hardwood stems 4 inches and greater except those marked in purple. Leave all conifer.
- C. HARVEST AND OPERATIONAL REQUIREMENTS AND SEASONAL RESTRICTIONS:**
- Oak wilt restriction. No operations between April 15<sup>th</sup> and July 15<sup>th</sup> (or as otherwise determined by the county).
  - Good summer chance operations all units (dry or frozen ground operations as determined by the county).
  - Utilization specification is to a 4" top. However, if the County determines that pulpwood markets continue to be very poor at the time of harvest the County will sign a contract amendment with the purchaser changing the utilization specification to a 5" top for the selected species. When determining condition of the market, the County will pay particular attention to the amount of wood being purchased by the mills in Wisconsin Rapids and any other significant shifts in the wood demand.
  - The western stand of unit 2 may contain some wet seeps and alder areas at the bottom of the valley. Extra slash application may be needed to protect these areas from soil disturbance.
  - Sale boundaries include red paint line, blue paint line, trails, and stark transitions into 15-year-old northern hardwood stand.
  - If harvest will utilize the whole tree, 1 in 10 tops must be left scattered throughout the sale.
  - Do not damage any survey monumentation.
- D. ACCESS AND ROADS:**
- Haul route, ATV trail, and snowmobile trail all exist on the same motorized route; however, they are offset on map to make them easier to distinguish from one another.
  - The skid route (approx. 100 ft) between the two portions of unit 1 are marked with red paint slashes (see map for location).
  - A new haul route (approx. 500 ft) will need to be constructed to access the eastern portion of unit 2 (see map for approx. location).
  - To access the western portion of the western stand of unit 1 a bike trail will need to be crossed (see map for location).
  - This sale also interfaces with ATV, bike, and snowmobile trails. Contractor to post appropriate signage where these trails enter or are adjacent to timber sale or haul routes. Use caution while hauling on these roads.
  - Excessive damage (beyond normal wear and tear) to the ATV, bike, or snowmobile trail, as determined by the county, will not be tolerated. If Bayfield County determines excessive damage has occurred, the Contractor may be held responsible for a portion or all of the repair. The County and Contractor must communicate on a regular basis to ensure issues are addressed in a timely manner and the trail remains in a safe and acceptable condition.
  - This contract requires County authorization for all road/landing construction and places a number other requirements on road construction and closure.
  - Decking of wood along town roads will not be allowed without permission from Bayfield County.
- E. OTHER:**
- To comply with Best Management Practices for Invasive Species: Prior to moving equipment onto or off the sale area, scrape or brush soil and debris from exterior surfaces to the extent practical.
